Geography 222 The Power of Maps and GIS
Supplemental Evaluation

Please respond to the following questions:

1. Has the use of technology helped you in learning the course concepts and materials? If yes, in what ways? If no, why not?

2. Overall, would you say the use of technology in this class has provided for a better learning experience than other courses in which technology is not utilized? Please explain.

3. How could technology be used more effectively in courses to improve your learning?

4. Was finding 'real' paper maps (Exercise 2) was a worthwhile part of the course? Why or why not?

5. Was learning to cite maps and graphics a worthwhile part of the course? Why or why not?

6. Was learning about privacy issues (property info) a worthwhile part of the course? Why or why not?

7. Was learning about the Census and using Census 2000 data a worthwhile part of the course? Why or why not?

8. Information literacy is a set of abilities requiring individuals to recognize when information is needed and have the ability to locate, evaluate, and use effectively the needed information. Do you believe that this course contributed to your general literacy in using information and information sources? Why or why not? Was locating and comparing maps of 'home' helpful in making you a more critical (and literate) user of geographic information?
